2 Introduction

2.1 Topic

This paper evaluates and critically reflects 'The Last Chapter Full of Laughter', a short documentary film produced as the final year Digital Media Project at Islington College, Kathmandu. The docuseries investigates Briddhashram Pashupati's elderly residents of Kathmandu, who enjoy their daily lives and community feeling in one of the government-run elderly care facilities of Nepal.

2.2 Area of research

The initiative falls within the umbrella of observational and participatory documentary filmmaking and investigates the work of cinematography, sound, colour grading, and editorial storytelling techniques. The core research question that has guided the project was: how can cinema, editing, audio design, and visual storytelling create an emotional connection with audiences to the lives of elderly residents in a care home?

3 Aims and objectives

The objective of the project was to shoot a short documentary film that shows the elderly residents of Briddhashram Pashupati, Kathmandu.

3.1 Objectives.

- A professional quality short documentary of around 6-8 minutes of duration to be produced
- Communicating a story with human and emotional beats set in a care home with elderly residents
- To show that we understand how to create a project with cinematography, editing, colour grading, and audio.
- The purpose of this report is to apply the documentary-making principles learned on the Digital Media Production programme.

3.2 Goals.

- Study the documentary genre and existing programmes with pre-production research.
- Secure authorization from your institution and obtain subject consent.
- Record a high quality interview and B-roll footage using professional grade kit over two shoot days.
- Use colour grading techniques in DaVinci Resolve to create a warm feel to your film.
- Capture and incorporate voiceover narration in English
- All Nepali language speech should have English subtitles.
- Produce a final export meeting broadcast quality technical standards.

4 Target Audience

From ages 18 to 50, the target audience of 'The Last Chapter Full of Laughter' are those with a social conscience. Due to the engagement levels in documentary content on digital platforms, this audience is quite diverse.

4.1 How to reach to audience

- YouTube and Vimeo are the main platforms for the distribution of documentaries.
- Facebook and Instagram are creating short clips and trailers targeting users aged 18 to 40 years from Nepal.
- Film festivals: Submissions for student and short documentary films.
- Courses Offered of Islington College and Partner Institutions
- Collaboration with NGO and elderly care organisations for exchanging information with relevant organisations.

5 Product Research on New Media Practices

During the pre-production phase, four similar documentary products were researched and analysed. Every product has played a role in influencing the creative and technical decisions throughout the process of producing this film.

5.1 How the Elderly Have Found a Home at Retirement Homes - Times of India (2022)

In the documentary by the Times of India, elderly residents share their experience of moving to a retirement home through interviews and observational B-roll footage.

Lessons learned: In the interview portions of the project, they used cutaway B-roll footage, so we adopted this approach too. We also used background music which is present there but not too loud so it takes away attention.

(India, 2022)

Figure 1.Product 1

5.2 Senior Citizens in Nepal -Nagarik Post TV (2023)

This documentary seeks to address the social, economic and emotional problems of old people in Nepal

The adopted approach through takeaway here is voiceover narration for both characters and interview style, however, interpretation of their rapid cutting pattern is rejected for delayed for more felt emotional rhythm.

(NagarikTV_NTV, 2023)

Figure 2product2

5.3 Panchawoti Home Episode 2 - NTV Plus (2019)

This documentary of a care home in Nepal uses strong establishing shots and well documented coverage to show its environment.

The documentary inspired the use of environmental establishing shots in order to contextualise the home within the Pashupatinath area. There was more emphasis on the emotional story arcs developed for each interview subject.

(PLUS, 2019)

Figure 3.prodcut3

5.4 The Lost Years — Katha (2024)

The insightful use of voice-over narration, a slow pace of editing, and careful visual imagery create profound audience empathy. Through the use of visuals, prose, and music, a singular emotion is created. Though some scenes move at a slow pace, while the entire length seems long.

As we took away our biggest learning we decided to do the same narrative approach in our documentary to drive the emotional flow of the documentary. We also felt the edit was very loose and hence maintained the tighter edit with final edit of about 6 mins and 30 seconds.

6 Technological employed

The main camera was the Sony A7V and shot at 4K 60 fps S-Log3 CineTone for the best dynamic range and colour grading flexibility. On the two shoot days, Sony ZV-E10II and the Sony A7CII were used as secondary cameras. To ensure that we had clear audio, we used the DJI Mic 3 wireless lapel microphone system. Two tripods gave stable camera support for all interviews setups.

We used Adobe Premiere Pro 2026 for editing and assembling the intermediate and final versions, as the software can handle 4K footage with relative ease and offers a wide range of editing, audio mixing, subtitles and graphics capabilities.

Katha, 2024)

Figure 4product4

7 Project Plan

The organization of the project took place following a set calendar created during pre-production and represented on a Gantt chart during Week 1 to Week 27 of the academic year. The shoot mostly took place on time. Some schedule adjustments were made to accommodate the two shoot day structure and the lengthy post-production of a three camera edit.

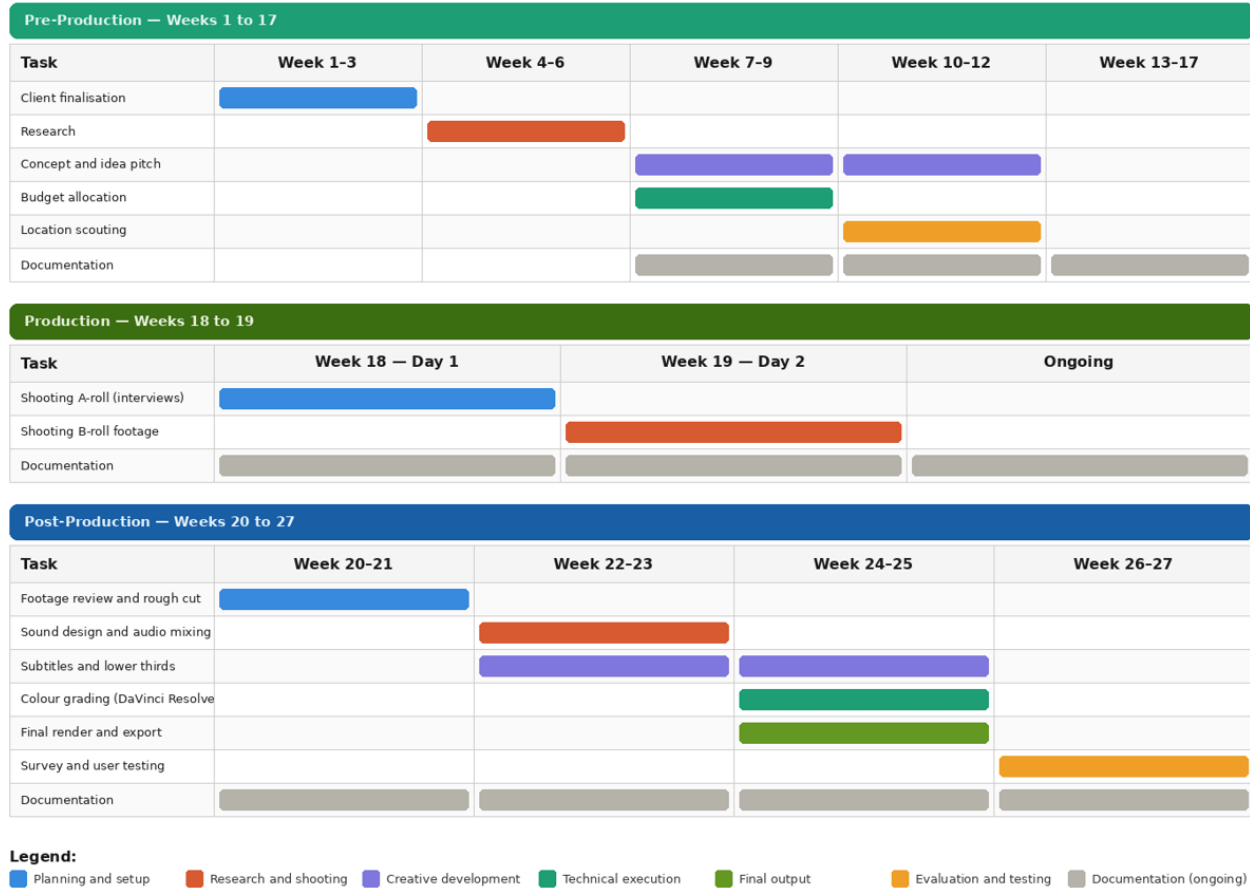

Figure 5. Gantt chart

8 Critical Analysis of Choices During Production

The major creative and technical decisions made in production significantly influenced the outcome of the documentary.

8.1 Choice of shooting format - 4K 60fps S-Log3

To maximise the image quality and to aid in post-production, it was decided to shoot in 4K 60 FPS in S-Log3 CineTone. S-Log3's dynamic range is larger than standard picture profiles, preserving detail in highlights and shadows that would be lost otherwise. This was especially important given the mixed lighting situations on both shoot days – bright outdoor areas and shaded indoor spaces in the home. The price to pay for this was a more complicated post-production process, involving colour space conversion in DaVinci Resolve before grading.

8.2 Choice of dual camera setup over gimbal

The aesthetic and practical decision to utilize two cameras on tripods was made rather than a gimbal. Almost of the coverage was done by using tripod setup. It gave stability and consistency that a gimbal handheld couldn't. The gimbal, visually, gave the film a slick, movie-like smoothness. This was deemed inappropriate for a documentary about real life. The handheld movement in the documentary's B-roll footage gave the observational sections a naturalistic, authentic quality in keeping with the visual philosophy of the project.

8.3 Choice of English voiceover over Nepali narration

The documentary's voice over language was chosen as English so that the documentary can reach national and international levels. By using English as the primary sound of the documentary, along with English subtitles of the Nepali interview content, the documentary can be understood and appreciated by any audience.

8.4 Decision to end on Mongol Raj Maharjan's laugh

The laugh of Mongol Raj Maharjan decided to close the interview section during editing. This man's laugh after the story of being abandoned by his children captures the whole message of the documentary in one unscripted laugh. Nothing could have directed the moment better; it would take fewer shoulders to weep with resilient joy. We made an important editorial decision for the film during the editing review when we recognize this moment and built the end section of the documentary around it.

9 Production Phases Evaluation and Analysis

9.1 Pre-Production

The foundations of the documentary film were established during the pre-production phase. The research was done over documentary making, camera work, colour grading and similar product. A thorough treatment was created, a shooter's list was generated, and a production timeline was developed and the required equipment was planned and arranged. Briddhashram Pashupati was visited for location scouting on about 25 March 2026, confirming the filming environment and access arrangements.

9.2 Production

The shooting occurred over two days, 31 March 2026, and the first week of April 2026. The first day's shoot primarily dealt with staff interviews and environmental B-roll as the elderly residents would need considerably more time to build trust before we could interview them. The production schedule was secondary to the wellbeing of human subjects. It was more ethical to take extra time. On the second shoot day, participants' interviews seemed much richer, and open as established a good rapport on the first visit, the elderly residents.

The pair of cameras which include a Sony A7V as the primary camera and either a ZV-E10II/A7CII as the secondary camera covered the interview subject fully. Setup And Performance Of DJI Mic 3

9.3 Post-Production

Post-production was completed over approximately two days. Editing was conducted in Adobe Premiere Pro 2026, with colour grading completed in DaVinci Resolve. The editing process involved reviewing and organising approximately two hours of raw footage, selecting and assembling the most impactful interview content, adding English voiceover narration, background music, subtitles, and lower third title cards, and exporting for colour grading.

The colour grade applied a warm, golden tone consistent with the documentary's themes of warmth and community. The S-Log3 to Rec.709 colour space transform was applied as the first node in DaVinci, followed by skin tone correction and creative grading. Camera matching between the three camera sources was completed to achieve visual consistency. The final documentary was exported as an H.264 file at 4K resolution, 60fps, with VBR 2 Pass encoding at 50 Mbps target bitrate.

10 Technical and Resource Issues

The most major technical challenge faced in this project includes the performance limitations of DaVinci Resolve while working on 4K 60fps S-Log3 footage.

The use of three different cameras across two shoot days resulted in colour mismatches in post. Specifically, the red tones rendered differently between the full-frame A7V and the APS-C ZV-E10II. DaVinci Resolve was used to match and correct the cameras individually. Upgrading on the second shoot day from the ZV-E10II to the A7CII, both are full-frame cameras and have similar colour science so there is a lot less colour matching work on Day 2 footage (A7CII and ZV-E10II use the same colour science).

Primary Camera	Sony A7V - 24-70mm f/2.8 GM II
Secondary Camera Day 1	Sony ZV-E10II - Sigma 35mm f/1.4
Secondary Camera Day 2	Sony A7CII - Sigma 24-70mm
Audio	DJI Mic 3 wireless lapel microphone
Support	Two tripods
Editing Software	Adobe Premiere Pro 2026
Colour Grading	DaVinci Resolve (Latest)
Recording Format	4K 60fps S-Log3.Cinetone

11 User Testing and Analysis

Structured user testing was conducted after finishing the documentary. Test audience feedback collected to evaluate the film's content, technical quality, impact, etc. Post the screening of the documentary, a survey form comprising of 20 questions was submitted to the viewers. The questionnaire included demographic information followed by content and story, technical quality, editing and structure and overall feedback.

11.1 Survey question

The Last Chapter Full of Laughter

Documentary Feedback Survey — Please take a moment to share your thoughts after watching the documentary. Your feedback helps improve the quality of this project.

1. What is your age group?

- ☐ Under 18
- ☐ 18–25
- ☐ 26–35
- ☐ 36–50
- ☐ 50+

2. What is your gender? *

- ☐ Male
- ☐ Female
- ☐ Prefer not to say

Figure 6question part1

3. How did you watch the documentary?

- ☐ Laptop
- ☐ Mobile phone
- ☐ TV screen
- ☐ Projected screen

...

4. How would you rate the documentary overall?

- | | | | | |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| ☆ | ☆ | ☆ | ☆ | ☆ |

5. Did the documentary clearly communicate its theme of community and togetherness?

- ☐ Strongly agree
- ☐ Agree
- ☐ Neutral
- ☐ Disagree
- ☐ Strongly disagree

Figure 7question part2

6. Which interview subject did you find most memorable?

- ☐ Milan Tamang (kitchen worker)
- ☐ Bimala thapa
- ☐ bumpa karaki
- ☐ shova kumar dhakal
- ☐ Bhagwati Sigdhel
- ☐ Mangal Raj Maharjan

...

7. Did the documentary make you feel emotionally connected to the residents?

- ☐ Strongly agree
- ☐ Agree
- ☐ Neutral
- ☐ Disagree
- ☐ Strongly disagree

Figure 8question part3

8. Did the documentary change your perspective on elderly care in Nepal?

- ☐ Yes, definitely
- ☐ Somewhat
- ☐ Not really
- ☐ No

...

9. How would you rate the video quality?

- ☐ Excellent
- ☐ Good
- ☐ Average
- ☐ Poor

19 responses

*Figure 18result7*

After the documentary was screened, a survey was given to the viewers. Most respondents were male and aged 18-26. They watched the documentary on mobile screen. The documentary was rated positively by most respondents overall. The audience found the audio quality, colour grading, and the interview portions among the best parts of the film. Most of the people strongly agreed to the documentary promoting the theme of community and togetherness when asked. The most memorable interviews were with Milan Tamang and the Bimala Thapa followed by bhumpa Kharki. Most of the people say they would definitely recommend it to any-one. These reactions validate the documentary's fulfilment of its main creative intent: the emotional connection between the audience and the residents at Briddhashram Pashupati. The documentary also successfully highlights the theme of togetherness and community.

12 Conclusion

The last chapter full of laughter. this is the most ambitious and personal project built in the digital media production course. The entire creation of this project from conception to final delivered colour grade was a real learning experience; technically, creatively and on a human level..

The making of this film has developed solid technical skills across camera work, editing, sound mixing and professional colour grading. It also developed a deeper understanding of responsibilities that documentary filmmaking carries particularly when it comes to vulnerable populations. My experience of being with the residents of Briddhashram Pashupati and listening to their stories which I am trusted to tell and given the sound knowledge no classroom exercise can give has been overwhelming.

To,
The Management,
Islington College,
Kathmandu, Nepal.

Subject: Permission Letter for Digital Media Project (Documentary Production)

Dear Sir/Madam,

This is to confirm that ISNAP Studio grants permission to Mr. Shusan Gharti Magar, a final-year student of BSc (Hons) in Multimedia Technologies at Islington College, to carry out his Digital Media Project (DMP) in association with our studio.

He is permitted to produce a documentary project for academic purposes only. All information, visuals, and materials collected during the project will be used strictly for educational submission and will remain confidential unless otherwise approved.

We wish him all the best for the successful completion of his project.

Yours sincerely,

[Authorized Signature]
